SpaceXSI Starter Pack for Cal Hacks 13.0

SpaceXSI is excited to sponsor Cal Hacks this year. This weekend, all attendees get one month of our new X Premium subscription (Cursor, Grok Bot, X and Grok) to use in your hackathon project! Here is how to claim your access and get started.

What We Provide

- One month of X Premium for every attendee, which includes Cursor, Grok Bot, X and Grok. Codes are handed out at the **SpaceXSI booth**.
- A SpaceXSI workshop on **Friday, Oct 23 at 8:00 PM.**

Make it Legendary challenge

Space gives you more to work with than almost any other field. You have access to enormous public datasets, decades of missions, and a literature no human can read all of. Real space data goes in and a legendary project comes out.

To be eligible, your project must be built with Cursor. The more you use Cursor, the more you're likely to win.

Bonus points, if you use Grok Bot for project planning and team collaboration.

Prizes

- **Every member of the winning team gets a Cursor mechanical keyboard.**
- **Everyone who submits is entered in a raffle for a Cursor Owala water bottle.**

How to Get Started

1. Pick up your X Premium code at the SpaceXSI booth.
2. Download Grok Bot at https://x.ai/bot (Mac or Windows) and sign in with the same Cursor account.
3. Submit your project to the Make it Legendary challenge on Devpost.

Need Help?

Find us at the SpaceXSI booth all weekend, or message us on the Cal Hacks Discord. Our team on site: Zach Carlo, and our Berkeley Campus Leads.
